---

## Suspended Ceiling Option A

Six section Aluminum framed white translucent acrylic suspended ceiling. This ceiling has a standard frame width of 1 1/2" and is commonly back lit with florescent light fixtures.

---

## Suspended Ceiling Option B

#4 Satin finish stainless steel suspended ceiling with 3" low voltage LED downlighting. Flush mounted panel size, and panel quantity, is always dictated by overall suspended ceiling dimensions. Traditional Material Options-

---

## Suspended Ceiling Option C

Plastic Laminate suspended ceiling with applied hardwood mouldings and 3" low voltage LED downlighting. Applied wood mouldings are stained to match laminate color.

Material Shown:  
Wilsonart Plastic Laminate -  
#7039-78 Windsor Mahogany

# Globe Architectural & Metal

---

## Suspended Ceiling Option D

#4 Satin finish bronze suspended ceiling with acrylic white translucent in-lay panels. The bronze frame shown in this option has a 4" wide perimeter along the suspended ceiling face, and maintains a 1 1/2" interior framing width to mount the in-lay panels. Note: this suspended ceiling can be fabricated in all metal options.

---

## Suspended Ceiling Option E

Option E displays a six sections Bead Blast stainless steel suspended ceiling. This option has florescent wash lighting that spills down from the outside of the ceiling into the cab. Note: this lighting style is an option for almost all custom suspended ceilings made by Globe Architectural & Metal.

---

## Suspended Ceiling Option F

Aluminum framed egg crate suspended ceiling. Globe Architectural & Metal always uses properly fire rated materials, so please keep in mind some plastics are not allowed in the manufacturing of this option.
